4" Veneer:

[Shouldice](#) and [Cordova Stones](#) and [Aria Slim, Trattino, Mesastone](#) :

- The natural materials used to create these stones are blended in state-of-the-art facilities to create versatile products capable of use above-grade, at-grade, or below-grade as necessary.
- Hardier than alternative stones. Many of their colors are obtained by the natural materials and additional pigments are not required, providing a durable, through-body and controlled color withstanding harsh cleanings and weathering.
