

Serving Kentucky, Ohio, and Indiana!

## **DISTINCTIVE Building Envelope PRODUCT LINES**

### **METAL PANELS: Formed, Extruded, Plate, ACM, MCM, IMP**

#### MAC METAL

- Unique and elegant formed metal claddings and soffits offering a wide inventory of profiles and colors that adapt perfectly to all projects. A wide variety of colors in the TEXTURAL III and IV paint processes that provides double protection, allows you to create unparalleled effects of depth, hue and texture. The range of colors in the Wood Collection offers colors of unparalleled richness. Each of the colors in this Collection are offered in 6 planks with various grains and shades that perfectly reproduce the look of wood. The range of colors from the Signature Collection offers shades that perfectly reproduce the appearance of noble materials such as oxidized copper and zinc. The Inspiration Collection color series offers you a rich and intense color series.

#### TITANTEK

- Formed metal panels and soffits available in G90 22 and 24 gauges, Aluminum 0.040 (3/64"), S/S, Copper, Zinc, Cor-ten, Titantek VariPanel System offers the profiles of a single baton, ribbed, angular, and reveals to use as a single panel, or any combination of panels, to create a unique layout. All panels work together. Wood-Metal Tubes and Louvers complete any interior or exterior façade, ceiling, and soffit project

#### ENGAGE FAST PLANK AND QUICK PANEL

- Aluminum Extruded Planks and Aluminum Composite Metal Panels with interlocking Trim Moldings for quick turnaround projects and on-the-job customization requirements.

#### CENTRIA

- High profile-and-performance insulated, and non-insulated, architectural metal building envelope systems and panels.
- Extensive color and profile selections to combine and bring projects to life!
- Insulated Metal Panels can improve project schedules and streamline productivity with one-step sheathing, thermal, weather barrier, and finish.

#### ALUMINUM PLATE MODULAR PANELS

- Our modular Intercept+ metal wall panels not only provide the desired protection in a rainscreen system but also elevate the aesthetic appeal of any architectural design.
- Select from 4 patterns, interchangeability, and variable sizes

Serving Kentucky, Ohio, and Indiana!

#### ALUMINUM and Metal COMPOSITE MATERIAL WALL PANEL SYSTEMS

- Altiers' MCM offers incomparable design flexibility to achieve dramatic finished appearance and impact. Manufactured to exacting tolerances and standards using state-of-the-art computerized equipment, these systems meet the highest performance testing standards and requirements. A wide variety of available material sizes and finishes provides for an endless array of design options.
- System 1000
  - Watertight, sealed joint design
  - Non-sequential installation
  - Easy, economical installation
- System 2000
  - Sequentially installed rear-ventilated rain screen system
  - No exposed fasteners
  - Proprietary extruded aluminum attachment system
  - Unique design allowing for efficient installation
- System 3000
  - Sequentially installed rear-ventilated rain screen system
  - No exposed fasteners
  - Proprietary extruded aluminum attachment system
  - Unique design allowing for efficient installation
- System 4000
  - Insulated core laminated panels for use in a glazed-in application
  - Variable panel thickness available
  - Fully laminated for drop-in installation

**FIBER CEMENT:**      [KOL](#) HIGH DENSITY FIBER CEMENT Raincreens

[NICHHA USA](#) Medium Density Fiber Cement

#### **RAINSCREEN PANELS AND ENGINEERED SUB-FRAMING:**

[EXO Sub Framing System](#) and [EXO FiberGlass GIRT](#); Engineered to your project requirements. Thermal Breaks. Attached panels and masonry rainscreens:

**TERRA COTTA:**      [TONALITY](#) Rainscreens

**PORCELAIN PANELS:**    STONE PEAK

**SLATE:**                [CUPACLAD](#) Rainscreens

**STONE Panels:**      [US Stone Industries](#)
